

CEFIONTECT GLAZE STANDARD FOR ALL TOTO CERAMICS

TOTO is the only manufacturer within the UK market to produce all of its ceramic products with its special CeFiONtect glaze. This outstanding hygiene is no longer limited to the toilets – the same high-quality ceramic is found in our washbasins. It's a standard feature – no extra charge.

SG

The SG collection is TOTO's answer to streamlined, timelessly elegant design. Every piece in this series is characterised by clear lines and rectangular shapes (see also small photo above).

MH

The MH collection offers the most design options of any of TOTO's lines, as well as the largest range of washbasins – from the smallest vessel handrinse basin to the 100 cm-wide furniture washbasin (see also small photo below).

NC

NC is inspired by a variety of natural forms. This collection is represented by curved, organic and flowing shapes (see also large photo left).

TOTO WASHBASINS UNIQUE QUALITY AND HIGHLY VERSATILE

Most TOTO washbasins can be combined with furnishings from other manufacturers. Please ask your retailer.

A PERFECT DUO WASHBASINS AND TOILETS WITH SPECIAL HYGIENIC GLAZE

TOTO

THE ULTRA-SMOOTH SPECIAL HYGIENIC GLAZE FOR EASY CLEANING

CEFIONTECT Standard in all TOTO washbasins and toilets

All TOTO ceramics feature our special CeFiONtect glaze. In addition to ensuring long-lasting shine, CeFiONtect guarantees the utmost in hygiene – it makes it nearly impossible for waste and mould to accumulate.

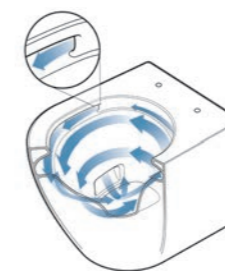

The ultra-smooth glaze on these ceramic surfaces literally redefines cleanliness. Conventional ceramic surfaces actually have rough surfaces, which cannot be seen with the naked eye. Under the microscope, they look like little mountain ranges. No matter how often these surfaces are cleaned, it is still possible for bacteria to collect in these uneven structures. In contrast, CeFiONtect creates incredibly smooth surfaces that give waste practically nowhere to hide. The special CeFiONtect glaze is applied to the ceramic prior to firing and is extremely durable. It provides long-term protection for the ceramic surface and promotes greater cleanliness.

After all, hygiene is standard in every TOTO bathroom.

Benefits

- Easier to clean
- Requires fewer cleaners
- Suitable for microfiber cloth

UNIQUE TOILET TECHNOLOGIES FOR GREATER HYGIENE IN THE BATHROOM

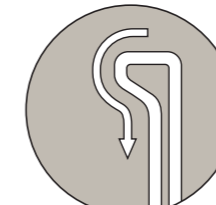

TORNADO FLUSH The highly effective three-jet flush

The water is propelled out of three jets, creating a whirlpool in the toilet bowl. In this way, the power of the water is channelled in a single direction, which effectively cleans

every inch of the bowl – making it practically impossible for waste and bacteria to accumulate. Tornado Flush is a standard feature in all TOTO toilets.

Conventional toilet bowl rim

TOTO's rimless design

RIMLESS TOILET BOWLS Easy to clean every inch

TOTO's rimless toilet bowls promote improved hygiene and are far easier to clean. Without the hard-to-reach areas below the rim, it is possible to eliminate practically all bacteria from the ceramic surface – even without a brush. When combined with the special CeFiONtect glaze, this feature brings unparalleled hygiene to once difficult-to-clean toilets.

The German Hygiene Certificate certifies that contamination from intestinal bacteria is 90% less in TOTO toilets than conventional toilets – over the entire inside of the toilet bowl. The outstanding quality of TOTO's toilets comes from the winning combination of our Tornado Flush, CeFiONtect glaze and rimless design.
